PAVES THE WAY FOR AN EASTERN LINE TO SAN DIEGO

(By Associated Press.) SAN FRANCISCO, July 18.—The suit of the Southern Pacific against John D. and A. B. Spreckels to recover \$2,867,000 advanced for the construction and operation of the San Diego and Arizona railroad since 1906 was dismissed today by the United States district court.

I. W. W. CHECKED BY POLICE WITH REVOLVERS

(By Associated Press.) MITCHELL, S. D., July 18.—A cordon of police with drawn revolvers prevented an invasion by alleged I. W. W.'s numbering several hundred coming from Sioux City to rescue five members held in jail here for vagrancy. The invaders were made to continue northward after the rush was checked.

WILL WITHDRAW TROOPS UNDER PERSHING IN MEXICO

(By Associated Press.) MEXICO CITY, July 18.—Special Agent Rodgers has informed the Mexican secretary of war that the American expeditionary forces will be gradually withdrawn from Mexican soil. The Mexican commissioners have been designated to reach a settlement of questions with the United States.

Sore Eyes

Granulated Eyelids. Eyes inflamed by exposure to Sun, Dust and Wind quickly relieved by Murine Eye Remedy. No Smearing, No Stinging. At Once Comfort. At Once Clear.

Your Druggist's 50c per Bottle. Murine Eye Remedy. 25c. For Book of the Eye Remedy. Druggists or Murine Eye Remedy Co., Chicago.

WHITE CAPS MINE AT MANHATTAN INSPECTED BY EASTERN VISITORS

Last Sunday morning a party consisting of John G. Kirchen, President M. R. Ward of the Tonopah Extension, Howard E. Butz, a newspaper publisher of Huntington, Penn., and a representative of the Bonanza visited the White Caps mine at Manhattan on invitation from Manager Kirchen.

There are two known ore bodies in the property, as developed down to the 210 level and stopped from there to the surface. The shaft was driven at a point where the vein, which inclines at an angle of 45 degrees, dips toward the working. Above the 210 not all the ore was worked, as it developed upon reaching water level and changing to sulphide, certain intractable qualities. At present there is \$68,000 worth of this rebellious ore on the dump. It has been most carefully tested and the result of the experiments is the finding of a process by which an extraction of approximately 90 per cent may be obtained. The same process is also adapted to the ore that has been found on the 310 level. The only addition to the process in vogue in the Associated mill, which has been acquired by the White Caps, is a roasting plant, which will be constructed at comparatively small cost. This roaster will be established at the foot of the ore dump, and a short distance above the mill. Treatment of the ore is expected to begin before the first of the year.

In the east crosscut on the 310 level a body of ore was recently encountered. It is several feet in width and assays uniformly \$17.20 a ton. This is several dollars better than the average on the 210 and above. The ore is jet black, because of its stibium content. In places the stibium crystals glint with metallic luster. Within a few feet of this ore body there are stringers of deep red reaching down, they having not yet lost their oxidation, or rather have more quickly succumbed to the effects of the permeating air.

This "black as your hat" ore is not believed to be the main ore body, but a raise was started on it yesterday and it is believed that it will

MOSQUE MONUMENT CAR TURNS OVER TO THE MOSLEMS ON STEEP GRADE

(By Associated Press.) LONDON, July 18.—To the many architectural beauties of London will be added after the war a grand mosque in memory of the Moslems who have fallen in the war on the side of the allies.

The work of raising funds for its erection is in the hands of Lord Headley, who embraced Mohammedanism three years ago and is a devout member of the faith. He has raised even now a large sum toward his object, but perhaps will obtain twice the sum now available before the building will begin.

In the records of the Mohammedan faith Lord Headley is described as "Saffurrahman Shalkh Rahmahillah Farooq," which is a title highly complimentary. Lord Headley has always had a reputation as an enthusiast, and this he is maintaining in his new religion. In his younger days he was the best boxer at Cambridge, having won the middleweight and the heavyweight honors. He is a civil engineer, a former editor and a large land owner in Ireland.

BRITISH FIND A NEAR BEER.

Teeter Drinks Twenty Pints Without Becoming Exhilarated.

London.—The long sought nonalcoholic beer has been found. The official liquor control board is so pleased with tests that it has resolved to push the sale of the beverage in the officially controlled public houses in the munitions areas. The board has invited the makers to send a supply to the house of commons to enable the members of parliament to try it. A member of the liquor control board said:

"It smells, looks and tastes like beer. The only difference is in the headache. Philip Snowden, a member of parliament, cites an instance of a workman who for the purpose of testing the new beverage drank twenty pint bottles and was not in the least intoxicated, although he admitted feeling rather full."

BIG STURGEON ON TROT LINE.

"Musical Fisherman" Makes Good Catch in California Stream.

Redding, Cal.—A 400 pound fish was caught in the Sacramento river by Eugene Barion, the "musical fisherman." Barion is called the "musical fisherman" because his 200 foot trot line stretched across the Sacramento at Middle creek is equipped with a chime of twelve Swiss bells, one for each line dangling from the main line with spoon attached.

Barion's catch was a sturgeon, a big fish that measured seven feet without the head. When the sturgeon grabbed the hook every one of the twelve bells rang a clatter that awakened him from his afternoon nap in his cabin ashore. The "musical fisherman" was unable to land his big catch alone. He had to call in the assistance of two neighbors. Barion's catch netted him \$63.

afford an excellent stop. Meanwhile Superintendent Cole is driving the crosscut ahead and the face is now in line that is striated with pure silica, while the entire magma is partly replaced with quartz.

Great interest attaches to the west crosscut. The round of holes last Saturday broke into a new water pocket and on the crevice the stibnite also appears together with what is known as Isabella yellow, an oxide of stibium and nearly always a bearer of values. Inasmuch as the water courses followed the lodes on the 210, it is believed that the main or shaft vein is being neared, if not already reached, although it was anticipated that it lay nearly forty feet ahead, judging from its situation on the 210.

Mr. Kirchen received a telephone message this afternoon that the raise was up two rounds and the entire face of the floor by six was in ore. The vein is quite flat at this place and there is every indication that it is opening out into a big ore body.

The White Caps is behaving much better than any other mine in Manhattan that has been worked to depth. It has on the surface every earmark of deep values, there being the Devonian limes, the oldest rocks in the state, and the lime shales, which were upthrust by the intrusion of massive alaskite, which shows in vast boulders and cliffs to the southward from the limes, occupying the same relative position as does the alaskite on Columbia mountain at Goldfield, making this eruptive substance the real floor of the two deposits and doubtless causing their enrichment. The surface of the White Caps is also covered with massive dykes of white quartzite, which doubtless gave the property its name.

Following the trend of the formation, one comes to the Manhattan Consolidated, a property that has known ore bodies, but they are somewhat intractable, although amenable to the process to be used upon the White Caps ore. The present suit to foreclose brought against the Manhattan Consolidated may result in the fusion of the two properties, or rather the embracement of the Consolidated by the neighboring company.

MOSQUE MONUMENT CAR TURNS OVER TO THE MOSLEMS ON STEEP GRADE

ED MCGHEE AND FAMILY MEET WITH ACCIDENT ON THOU. SAND CREEK HILL

A Denio correspondent of the Winnemucca Humboldt Star tells of an automobile accident in which Ed McGhee, the Thousand Creek rancher, was injured the early part of this month.

Mr. McGhee and his family were on their way home when the accident happened. They had reached Thousand Creek hill when the engine began to give trouble and Mr. McGhee had to stop and his wife blocked the rear wheel with a large rock. He put on the emergency brake and got out to adjust the carburetor. Then he started to crank the engine and the car began slipping backwards, passed over the rock and started down the hill. Mr. McGhee attempted to get into the car to adjust the footbrake and was almost inside when it left the road and turned over him. The car turned over a second time and stopped right side up. Injured as he was, Mr. McGhee managed to walk to his home, a distance of about three miles.

Men with teams pulled the car up the hill and Mr. McGhee drove it to Denio, where a doctor attended him, finding that he had several broken ribs. He is now getting along nicely and considers that he got off very lucky. Fortunately his wife and two boys were out of the car at the time of the accident.

MRS. L. G. DONNELLY was a passenger on last night's auto stage from Goldfield.

PREDICT ADVANCE IN PRICE OF SILVER DESPITE THE PRESENT DEPRESSION

An eastern statistician has figured it out that the fundamental reason why silver must advance is because Europe is today on a paper basis; Germany has commanded the gold from the people's pockets to the bank's vaults; Russia has done practically the same; France has requested it and England has relied upon patriotism to accomplish its purpose.

When the war broke out this same statistician continues, the great government banks of Europe had roughly \$2,400,000,000 gold in their vaults. Since then, despite all efforts, the stock has only been increased another billion, excluding some \$500,000,000 sent to the United States. The significant monetary fact, however, is that the original \$2,400,000,000 supported only \$4,500,000,000 of paper, whereas the present \$3,400,000,000 has been called upon to maintain \$9,800,000,000. In other words, the gold proportion has dropped from 53 to 34 per cent, says the Mining World.

The irreducible limit for the European metallic base would seem to have been reached. At the same time, it is impossible to increase the supply of gold. The governments of Europe are, therefore, turning to silver more and more as they inevitably must, since gold will be unable to meet the demands of world business and since paper currency rapidly loses its purchasing power. A strong metallic base is always necessary.

INVENTOR CLAIMS DOUBLE DISCOVERY

WIRELESS TRANSMISSION UNDER THE EARTH INVOLVES NEW PRINCIPLES

SAN FRANCISCO, July 18.—Dr. H. Barringer Cox, known in the world of electrical science as an inventive genius, announced here yesterday that he had perfected a subterranean wireless telephone and that, incidentally, he had discovered a new law of physics—that electrical energy can be transmitted over a single conductor.

For the last five months Dr. Cox has been working at Los Olivos, Cal., with the United States Forest service in an effort to perfect a system of wireless signals for forest fires. It was while so engaged, he said, that he discovered the possibility of transmitting the human voice through the ground. He will leave in a few days for the east to obtain patents and arrange for equipping the California forest district with instruments. The equipment consists of an ordinary telephone transmitter connected with a battery and a special instrument—Dr. Cox's secret—with a ground wire. At the receiving station, five or fifty miles away, is a similar equipment.

TEMPERATURE REPORT

Highest temperature yesterday, 81; lowest this morning, 53.
Highest temperature a year ago, 88; lowest, 65.

PERSONAL

ZEB KENDALL arrived this morning from San Francisco.

W. PAINTER and wife were passengers today from Reno.

MRS. FLORENCE CLARK returned today in her new auto from Mina.

WALTER LAMB, owner of the Miner, came in on No. 24 today from San Francisco.

FRANK H. NORCROSS, Republican candidate for U. S. senator, left this morning for his home in Carson City.

E. JEDELL, of San Francisco, motored over in the Brown and Parker auto stage from Goldfield last night.

HUGH H. BROWN was a passenger this morning for Winnemucca, where he goes in the interests of clients.

JOHN ZEIGLER, of the R. & M. meat market in Manhattan, came in last night to visit his brother, Chris Zeigler.

DR. J. L. MCCARTHY, Democratic National committeeman for Nevada, motored over from Goldfield yesterday afternoon and returned accompanied by J. J. Mullin, chairman of the Nevada Industrial commission.

READ THE OTHER WAY TO READ IT RIGHT

CHINESE FASHION OF UP AND DOWN WRITING THAT WAS NOT UNDERSTOOD

The county auditor and recorder often "bumps" against some things he is not always looking for. Recently a correspondent sent in six names, asking if they were recorded mining claims. Failing to find any sign of the Annie Moore and Belle claims, belonging to Mrs. Langtry, and the Leon and Connaught claims owned by Johnny Johnson, Billy Grimes replied there was not a sign of such records. This same mysterious individual answered and suggested that Billy read the report from the bottom up, making it appear thusly: The Johnnie Johnson, Connaught and Leon claims by Mrs. Langtry, and the Belle by Annie Moore.

AUTOMOBILE SALES REMAIN AHEAD OF THE SUPPLY

The automobile sales for the past three months have been remarkable. The Bertram company sold a Hubmobile to S. G. Hendricks, a Republic two ton truck to a business house in Ely and a Saxon to Mrs. Florence Clark of Mina. Two Dodge cars arrived yesterday from Reno and were delivered by the Tonopah Auto Supply company to the Brown-Parker Auto company and J. C. Parks, station agent at Millers. It is estimated that 75 motor cars were sold since April 1.

GOLDFIELD WATER COMPANY APPEALS TO FEDERAL COURT

The Goldfield Consolidated Water case, in which rates for the people of Goldfield were reduced by the Public Service commission from \$7.50 to \$3 per 1000 gallons, will be heard before Judge Farrington in the Federal court at Carson City July 20, upon application of the water company for an injunction to prevent the commission from making said reduced rates effective.

NEW YORK ATTORNEY NAMED FOR CONSTANTINOPLE

(By Associated Press.) WASHINGTON, July 18.—Abram Elkus of New York was nominated today by the president for ambassador to Turkey to succeed Henry Morgenthau, who recommended him. He is a lawyer.

NOTICE TO REPUBLICANS

The Republican County Central committee will meet Thursday evening, July 20th, at 8:30 o'clock in the office of Grant Crumley. A full attendance is urged.

By order LETSON BALLEET, Chairman.

Adv. J19-3t ALFRED BOYLE, Secretary.

BUTLER THEATER

Fanny Ward, the famous American star, who is to be seen at the Butler this evening in the Lasky production of "The Cheat," as the extravagant society leader, has ample opportunity to introduce a number of the latest Parisian gowns. In "The Cheat" she is seen as an extravagant, frivolous member of Long Island's smart set. She unfortunately gambles and loses a \$10,000 Red Cross fund entrusted to her care. How she secures the money from a wealthy Japanese and in attempting to repay arouses his anger and is branded on the shoulder with a red hot iron. The audience sees this done before its eyes and later sees the glowing scar on Miss Ward's shoulder. The preliminary reel will be Burton Holmes travel pictures, "Cruising in the Philippines." Tomorrow, Napoleon and Sally, the educated chimps, and the distinguished actor, House Peters, in "The Hand of Peril," a wonderful detective play. Saturday, Charlie Chaplin. Saturday, best you forget.
